JUSTIN **DAY**

AI-Native Software Developer

New York, NY | (929) 720-1125 |

SUMMARY

AI-native software developer and CS graduate pursuing an MSc in Software Engineering at Arizona State University, with a foundation in full-stack development, cybersecurity, and IT. Currently completing the Pursuit AI-Native Program, developing software with modern AI-assisted workflows using Cursor, Claude, and Codex. Strong problem-solving and communication skills developed through software projects and technical support experience.

SKILLS

Languages	Python, TypeScript, JavaScript, SQL, Java, C#
Development	Next.js, React, FastAPI, Django, Node.js, Express, Tailwind CSS, Supabase (PostgreSQL), REST APIs
Data & AI	Anthropic Claude API, Google Gemini API, Agentic Workflows, Prompt Caching, PyTorch, pandas
AI Development	Cursor IDE, Claude Code, GitHub Copilot, ChatGPT (Codex)
Tools & Testing	Git, Vercel, Render, pytest, Vitest, Splunk, Wireshark, Agile

PROJECTS

Professor Fritts – AI Clean Energy Planning Agent [live site] [source]

Next.js 16, FastAPI, Django, Supabase Postgres, Anthropic Claude API, Python *Pursuit*

- Engineered a full-stack AI planning agent for NYC public buildings that evaluates property data, solar production (NLR PVWatts), and NYC Open Data/PLUTO footprints to generate multi-scenario clean energy roadmaps and financial payback models.
- Implemented a 4-stage validation and hardening pipeline featuring prompt-injection quarantine, deterministic provenance verification (enforcing citations across facts, calculations, and assumptions), and prompt caching to reduce LLM API costs by ∼90%.

TaskLocal – Trust & Safety Moderation Dashboard [source]

Next.js 16, React 19, TypeScript, Tailwind CSS, Supabase, Google Gemini API, Vitest *Pursuit*

- Rapidly architected an internal Trust & Safety triage desk and executive briefing dashboard over a shared PostgreSQL database, enabling marketplace reviewers to filter, inspect, and resolve reported customer reviews.
- Built a privacy-first AI analysis pipeline that strips PII (emails, phone numbers, URLs, and handles) before prompting Gemini for risk insights, pairing deterministic local chart computations with Row-Level Security (RLS) and Vitest test coverage.

EXPERIENCE

Spectrum New York, NY

Technical Support Representative II *May 2024 – April 2025*

- Provided technical troubleshooting and support for home video, internet, and account services, diagnosing and resolving customer issues across multiple product lines.
- Consistently exceeded KPIs, maintaining a 90%+ first-call resolution rate alongside high customer satisfaction and efficient handle times, and earned promotion from Representative I to II within 4 months.

EDUCATION

Arizona State University Tempe, AZ (Online)

Master of Science in Engineering Science – Software Engineering *Expected May 2028*

CUNY Queens College Flushing, NY

Bachelor of Science in Computer Science *May 2023*

CERTIFICATIONS

Pursuit AI-Native Program *In Progress (2026–2027)*

Google Cybersecurity Professional Certificate – Coursera *2023*

Data Analysis & Agile Development Certificate – Pathstream *2025*
